Date: June 1, 2011
File #: 5-A-11-SAP
Subject: Major Road Plan 2011 Update

Staff Recommendation:

Approve the 2011 Major Road Plan update.

Comments:

The Major Road Plan is used in the regulation of land use and is identified in the Knoxville-Knox County Minimum Subdivision Regulations. The subdivision regulations state that right-of-way widths for classified streets shall be provided in accordance with the requirements of the Major Road Plan. The minimum right-of-way widths for classified streets are required by the Major Road Plan to accommodate future road, utility, sidewalk and bikeway improvements.

As part of the Update for the Major Road Plan, staff consulted with City and County engineering to determine what changes were needed. All changes with the Major Road Plan were scheduled to be presented at a public meeting on April 27th. That night severe weather prevented most of the public from being able to attend. This meeting was rescheduled for May 24th and held from 5 to 6 PM in the Small Assembly Room. Five people attended the public meeting.

As a part of the 2011 Update to the Major Road Plan, the following changes have been made:

- Functional Classification has been replaced with Roadway Classification in the document since some classifications with the Major Road Plan do not match the Functional Classification Map that TDOT uses.
- Removal of Future Improvements 3 (Midway Road Extension), 4 (Brakebill Road Realignment), 5 (Bud MacMillan Extension), 6 (Dante Connection with Maynardville Highway), 12 (Campbell Station Realignment), 14 (Moody Avenue Extension), 15 (Ault Road Extension), 16 (Realignment of Gallaher View), and 18 (Knoxville Regional Parkway).
- Future Improvement 1 is renamed to James White Parkway Extension.
- Future Improvement 2 has been constructed and is included as part of Hall of Fame Drive.
- Future Improvement 7 is renamed to Powell Drive Extension.

- Future Improvement 8 is renamed to Schaad Road and Schaad Road Extension.
- Future Improvement 9 is renamed to Karns Valley Drive.
- Future Improvement 10 is renamed to Karns Valley Drive Extension.
- Future Improvement 11 has been constructed and is part of the current Lovell Road.
- Future Improvement 13 has been constructed and is part of the current Campbell Station Road.
- Future Improvement 17 has been renamed to Murphy Road Extension.
- All references of Future Improvements have been removed from the To/From Termini within the Major Road Plan tables. The names of the projects have been used in their place.
- Magnolia Avenue between Broadway and Hall of Fame Drive has been changed from a Major Arterial to a Minor Collector.
- 5th Avenue from Broadway to Hall of Fame Drive has been changed from a Major Collector to a Major Arterial.
- Brakebill Road from Asheville Highway to Strawberry Plains Pike has been changed from a Minor Arterial and Minor Collector to a Major Collector.
- Centerline Drive from Valley View Drive to Washington Pike has been changed from a local street to a Minor Collector.
- Outlet Drive and Outlet Drive Extension from Lovell Road to Campbell Station Road has been changed from a local street to a Major Collector.
- Hall of Fame Drive from Broadway to Hill Avenue has been changed from a Minor Collector to a Minor Arterial. (Women's Basketball Hall of Fame Drive is referenced as Hall of Fame Drive)
- Dante Road/Fountain City Road re-alignment has been shown, the new alignment has a Minor Arterial classification.
- Mountain Grove Road from Governor John Sevier Highway to Chapman Highway has been changed from a local street to a Minor Collector.
- Winona Street has been referenced in the tables from McCalla Avenue to Martin Luther King Jr. Avenue to match the existing Major Road Plan Map.
- Tillery Road has had its name changed from Tillery Drive.
- National Drive has been combined from North National Drive and South National Drive.
- Jenkins Road has been corrected to Jenkins Drive.
- Increased ROW on Millertown Pike between Washington Pike and Mill Road from 70' to 100'
- Increased ROW on Raccoon Valley Drive between Anderson County Line and I-75 from 88' to 100'
- Increased ROW on Western Avenue between Schaad Road and Hinton Road from 88' to 100'
- Increased ROW on Hall of Fame Drive between Church Avenue and Hill Avenue from 90' to 100'
- Increased ROW on Anita Drive between Sevier Avenue and Hillwood Drive from 60' to 100'
- Decreased ROW on Northshore Drive between Ebenezer Road and Concord Road from 100' to 88'.

**KNOXVILLE-KNOX COUNTY
METROPOLITAN PLANNING COMMISSION
A RESOLUTION ADOPTING THE 2011 MAJOR ROAD PLAN**

WHEREAS, the Knoxville-Knox County Metropolitan Planning Commission, a regional planning commission established pursuant to state statute, has the duty to make and adopt plans for the physical development within the City of Knoxville and Knox County;

WHEREAS, in its charter, the City of Knoxville has identified the Metropolitan Planning Commission as the planning agency responsible for the preparation of comprehensive development plans;

WHEREAS, the last Major Road Plan was adopted in 2004 and development patterns and the street and highway system continue to change;

WHEREAS, the City of Knoxville and Knox County adopted the Knoxville-Knox County General Plan 2033, providing an updated agenda for quality growth that should be reflected in the Major Road Plan;

WHEREAS, the Major Road Plan is identified in the Knoxville-Knox County Minimum Subdivision Regulations and is used in the process of regulating land use;

WHEREAS, the Metropolitan Planning Commission staff prepared the Major Road Plan update in consultation with city and county engineering departments;

NOW, THEREFORE, BE IT RESOLVED BY THE KNOXVILLE-KNOX COUNTY METROPOLITAN PLANNING COMMISSION:

SECTION 1: The Commission hereby adopts the Major Road Plan which identifies the roadway classification and required right-of-way dedication of the City of Knoxville and Knox County street and highway system. The Major Road Plan consists of text defining roadway classifications; tables identifying classified roads, the extent of and type of classification, and required right-of-way dedication; and a map that shows the functional classification of the street and highway system.

SECTION 2: The Metropolitan Planning Commission forwards this Major Road Plan to the Knoxville City Council and Knox County Commission for approval.

SECTION 3: Upon adoption of the Major Road Plan by the Metropolitan Planning Commission, Knoxville City Council and Knox County Commission, the Knoxville-Knox County General Plan 2033 is amended to reflect the updated Major Road Plan.

SECTION 4: This Resolution shall take effect upon its approval by the Metropolitan Planning Commission, Knoxville City Council and Knox County Commission.

Date of Adoption

Chair

Major Road Plan

For

The City of Knoxville and Knox County, Tennessee

An Amendment to:

The Knoxville-Knox County General Plan 2033

Prepared by:

The Knoxville-Knox County Metropolitan Planning Commission

Dates of Plan Update Adoption:

Metropolitan Planning Commission
Knoxville City Council
Knox County Commission

Major Road Plan

The Major Road Plan views each road as part of the overall transportation system and identifies its roadway classification. It assigns right-of-way requirements based on the purpose and function of the road, future road improvements, future pedestrian improvements, traffic counts, anticipated development, and policies and goals contained in adopted sector plans, long range mobility plans, the Knoxville-Knox County General Plan and/or other documents.

The Major Road Plan is used in the regulation of land use and is identified in the Knoxville-Knox County Minimum Subdivision Regulations. The subdivision regulations state that right-of-way widths for classified streets shall be provided in accordance with the requirements of the Major Road Plan. The minimum right-of-way widths for classified streets are required by the Major Road Plan to accommodate future road, utility, sidewalk and bikeway improvements. The maps and text of the Major Road Plan should be consulted to determine the required right-of-way width of a particular street segment.

The right-of-way widths identified in the Major Road Plan shall constitute a minimum. Whenever the existing right-of-way is greater than what the Major Road Plan requires, the existing right-of-way shall be used and may not be reduced without consent of the respective municipal engineering departments.

Future road improvements are included in the Major Road Plan for informational purposes and outline projects desired by the city and county engineering departments and do not constitute projects that have been obligated. In cases where road improvements require a new alignment, the desired general alignment is shown on the map.

The roadway classifications of streets in the Town of Farragut are included in the Major Road Plan for informational purposes only and classifications are not guaranteed. The Town of Farragut is responsible for their own planning, functional classification determinations and road plans.

Major Road Plan Tables

The tables included in the following pages of the Major Road Plan contain all the classified streets in the City of Knoxville and Knox County in alphabetical order. Each classified street is accompanied by its roadway classification, segment termini, and right-of-way requirement.

Numerous streets contain multiple classifications and/or right-of-way requirements. Consult the tables and map to assist in determining the correct information. Metropolitan Planning Commission staff is available to provide assistance, please contact our office at (865) 215-2500. The Major Road Plan can also be viewed at www.knoxmpc.org. A Major Road Plan theme can be accessed on www.kgis.org to give a numerical ROW on a GIS map.

Roadway Classification

The following are definitions of each roadway classification within the Knoxville-Knox County Major Road Plan:

Interstate- A divided highway, designated under the Interstate Highway System, designed for the safe, unimpeded movement of large volumes of through traffic with full access control and grade separation at intersections. Interchange spacing is typically greater than one mile.

Expressway- A divided highway designed for the safe, unimpeded movement of large volumes of through traffic. Intersection grade separation and full access control is desired, however may contain occasional at grade intersections. Intersection spacing is typically one mile or greater.

Major Arterial- A street that provides major movement within the area, provides intercommunity connections to the local street system and moves through traffic between activity centers. Access control is desirable. The spacing of Major Arterials is typically 1/8-1/4 mile in a downtown, 1/4-1/2 mile in urban areas, 1/2-1 mile in suburban areas and greater than 1 mile in rural areas. Intersection spacing is typically 1/2 mile or greater.

Minor Arterial- A street that augments the principal arterial system, carries trips of moderate length and moves through traffic between activity centers. Access control is desirable. The spacing of Minor Arterials is typically 1/8-1/4 mile in a downtown, 1/4-1/2 mile in urban areas, 1/2-1 mile in suburban areas and greater than 1 mile in rural areas. Intersection spacing is typically 400 feet or greater.

Major Collector- A street that primarily provides for short distance traffic movement and primarily functions to collect and distribute traffic between local streets and high volume traffic generators and arterials. The spacing of Major Collectors is typically 1/2 mile and intersection spacing is typically 300 feet or greater.

Minor Collector- A street that primarily functions to collect and distribute traffic between local streets and arterials and provides direct access to abutting land. The spacing of Minor Collectors is typically 1/2 mile or less and intersection spacing is typically around 300 feet.

Local Street- A minor street that provides direct access to abutting land. Intersection spacing is 150 feet or greater
