Dear MPC Commissioners,

I'd like to recognize the excellent work done by the MPC staff developing the Northeast County Sector Plan. The staff held three rounds of public meetings and encouraged community participation by locating them in several areas the sector. The first rounds of meetings were well attended, and the staff incorporated feedback from the community during each round. The staff took the time to listen, and offer clear explanations when residents were unclear about how the process worked, or when proposals were being offered that didn't make sense but were required because of statutory or plan framework requirements.

In particular, I'd like to call out Bryan Berry, who I think did a great job taking a number of diverse opinions from a diverse population, and representing those opinions where possible in the planning document.

The final product represents the community's desires and aspirations, and puts in place good guidelines for the evolution of northeast Knox County. All of the MPC staff involved in crafting the plan deserve kudos for an excellent job.

I support adoption of the plan as it is being presented at today's meeting.

-Kevin

I concur with these remarks. Great job Bryan!

Lisa
