The water and sewer lines have sufficient capacity for your projected 60 homes. I am not aware of any issues with water system along Mourfield Rd.

we are looking at putting in 60 homes on the 17 acres at 1130 mourfield rd. the opposition has stated there is problems w/ water on their rd. maps show 2 water lines running in front of this property and a sewer line running through the northern end. are there any issues w/ our plans as far as service for water and sewer for this development?
