Tue, Feb 7, 2017 at 2:14 PM

Dear Metropolitan Planning Commission Members,

This correspondence is in reference to Agenda Item #40 - 2-A-17-RZ_2-A-17-SP/Southeast Commercial LLC, for the meeting being held this Thursday, February 9, 2017. Southeast Commercial LLC is looking to rezone this land from Residential to Office Space. The owners listed on the Plan Amendment/Report (http://agenda.knoxmpc.org/packages/2-A-17-RZ_2-A-17-SP_pkg.pdf) is "The Steps House." From further research, this is a Substance Abuse Rehabilitation company. Directly across the street from this property are hundreds of homes with hundreds of young families and hundreds of children. My family, that includes my two small children, is within walking distance of this property.

As the MPC staff has recommended in their report, this is not a commercial area and it does not make sense to have an office building in the midst of a residential area. It also does not behoove our family friendly community to have a Substance Abuse Rehabilitation Center so close to so many homes.

Thank you for your time and attention to this matter.

Sincerely,
Kerry Bennink

3217 Red Meadow Road

Reply-To: kbcarter16@gmail.com

To: commission@knoxmpc.org

Hello,

My name is Kevin B. Carter and I live at 3213 Red Meadow Road in Knoxville (Karns Community). I have recently been notified of a proposal to introduce a drug treatment facility on Zion Lane. As I'm aware the MPC will be discussing this matter (item no.40) on Feb 9 at 1:30pm. I will not be able to attend this meeting and wanted to share my opposition to this proposal. As I have learned through the MPC, this proposal for a "spot rezone" will be denied by the MPC. I hope this is upheld even if the company files an appeal with the Knox County Commission.

This area is primarily residential with many young families with children and elderly residents. It is the general consensus within the Foxfield subdivision, as well as the rest of the subdivisions and residences in the general vicinity to the proposed site, that this would not be a good decision for the Karns community. Although no one has a problem with people getting help for addictions, we feel this is just not the appropriate area to have a facility like this. There are obvious common sense concerns to allowing such a facility in our "backyard".

To: commission@knoxmpc.org

I live on Ball Rd and my family is not happy with the decision to build an addiction center so close to so many people, this is a residential area. It is not zoned for any other purpose that I know of. We have a lot of children in this area as well as a school that is close. There is a lot of people who cut through Ball Rd already and is difficult to get out of our driveway. I don't think just putting a facility into a area just to be putting it there is a thought out plan! We are asking you to please put this in another area.

Dear Knox county MPC commissioners, were do we start (Knox county residents) to having a opt out of prison drug rehab facility in the middle of residential neighborhood. To start the location of this is also a school bus stop for k-12 grades, this should make are children more susceptible to illegal activities. Also this is a residential neighborhood were people bust there butts to make a living, but now you would like to introduce a thriving community for addicts to take over and destroy as in " theft, drug use, trespassing ect." Also there is a elementary school very nearby the proposed location. Now how can u have a safe school environment down the road from a addiction center (YOU CANT) these are some of many issues you are proposing to bring towards a quit hard working community that will stand up for what we have built. Please feel free to contact me with how these issues would not affect us! Thanks for your time in this proposal, Nathan Haugstad

To Whom it May Concern,

I am not in support of the rezoning to be discussed regarding 2-A-17-SP and 2-A-17-RZ. I live in this area with many neighborhoods, daycares, and small children. I along with many others prefer to keep the area in question on Zion road residential. Please vote NO to the rezoning issues on Thursday and keep the area of Karns safe.

Thank you,
Sarah

Reply-To: kimhooks@me.com

To: commission@knoxmpc.org

I was just informed that building an addiction facility is being considered near Zion Lane (Ball Camp Area). I would like to request that this facility NOT be built in this area. This area is a residential area, with beautiful landscapes all around. We do not need a business facility in this area. In addition, I think adding a facility of this nature near a residential area would be dangerous. Given that the people coming and going are addicted to some form of drug and those coming into the area could put the residents in danger. It seems a facility of this nature would be best put in an industrial area rather than a residential area. Thank you for your time.

I live in the area of the proposed rehabilitation center on the corner of Ball Rd. and Zion Rd. A facility like this has absolutely zero place in our community. There is research which shows having a center such as this close by can negatively affect home values. Our communities have suffered enough at the hands of petty thief drug addicts without now having to worry about our property values dropping. Our community is a safe, family oriented community. The negative impact along with the stigma of such a place will have long reaching negative impacts on our people. Please vote to deny the proposed addiction treatment center at the next MPC meeting on Thursday.

Thank you,

Amanda Keck

Hi. My wife and I would like to see our commissioners vote "No" on the addiction treatment facility on Zion Lane. The immediate area around this location is largely residential and it doesn't make sense to put this type of facility in a heavily residential populated area.

There are many places in the surrounding community that would be better suited for this type of center and not be placed smack dab in the middle of several subdivisions and houses along Ball Road.

We live in the Shadowbrook subdivision and would be highly disappointed to see the zoning commission use a "spot zoning" tactic to allow this to happen in the middle of a residential area. PLEASE VOTE "NO".

Thanks.

Dear commission,

It was recently brought to my attention that an addiction treatment facility is wanting to locate in the Ball Camp community. I do not think this is the appropriate place for a facility of this kind. It would be built in a residential neighborhood, and would directly affect the safety and property values of the local residents. Myself and many of my neighbors hope you will see that rezoning and changing the sector plan is not wanted by the community. Thank you for your time. This email is in reference to file #2-A-17-SP and 2-A-17-RZ.

Thanks,

I am a resident of the Foxfield Subdivision off Ball Rd. We have a very nice neighborhood with over 50 children. It was brought to my attention last evening that there is a proposal to rezone property directly across Ball Road from our entrance for an Addiction Treatment Facility. I like to think that I would do as the Bible says and help those in need. Feed the hungry. Shelter the homeless. Etc. But I do not want this place across the street from my house and my 5 year old son. This appears to be a Meth Clinic. The patients are free to come and go. I am all for helping people. But not if it means putting my son in harm's way. There are several properties that are already zoned for this type of facility. Please keep the safety of our children (and the hundreds of children in that area) in mind and deny this request. Thank you.

MPC Commission,

This is to let you know that I and many more Karns residents are opposed to the request to rezone a property at 3430 Zion Lane, Knoxville, TN. 37931. This item is #40 on the agenda, reference File #2-A-17-SP and 2-A-17-RZ.. This area is 100% residential and has 6 subdivisions within a miles distance from the property requesting rezoning. Furthermore their is currently a child day care center within walking distance of this property and young children get on and off school buses in the mornings and afternoons . This rezoning request is not in the best interest of the majority of Karns residents. I have also contacted county commissioner Brad Anders and expressed my opposition to this request too. We request that it be denied.

Sincerely,

R.V.Johnson

February 8, 2017

Metropolitan Planning Commission and Knox County Commissioner,

I am writing to you in regards to the request to rezone property on Zion Lane to allow an Addiction Treatment Facility to be built. This topic will come up on February 9th, 2017 as Agenda Item # 40.

My family of three, soon to be four, has resided in Foxfield subdivision, a subdivision located in very close proximity to this property, for almost 4 years. **I am strongly opposed to this proposal** for the following reasons.

Rezoning this property to allow an Addiction Treatment Facility is also undesirable for the people being treated because they will not have public transportation to Karns, there are not many job opportunities in Karns either.

Due to the safety concerns of my children as well as the growing community of Karns with middle class families I am highly opposed to this. Our neighborhood alone has children in almost every house and the area around Ball Rd. has grown significantly in the last 5 years. It is no secret that convicted criminals are typically sent to attend Addiction Treatment Facilities to avoid serving jail or prison sentences. Rezoning this property to allow an Addiction Treatment Facility is undesirable to all of the neighborhoods with children due to locating addicts of drugs, sex and alcohol within a close proximity.

Rezoning this property to allow an Addiction Treatment Facility is undesirable for the community of Karns because it will lower the property value of all of the new and old housing developments and it deter companies from wanting to come to Karns.

In conclusion, I strongly urge you **not** to allow rezoning for the purpose of establishing an Addiction Treatment Facility in this residential part of the Karns community. If you have any doubts about the validity of these reasons, and you haven't visited Ball Road and noticed the growing community, I urge you to do so before this item comes up for consideration. Allowing an Addiction Treatment Facility in this area would be a mistake.

Thank you for your time and consideration in this matter,

Patricia Wyatt

Foxfield Resident

[MPC Comment] Opposed to Addiction Treatment Facility Rezone in Karns

1 message

B Bates <bevinbates@gmail.com>

Wed, Feb 8, 2017 at 10:04 AM

Reply-To: bevinbates@gmail.com

To: brad.anders@knoxcounty.org, commission@knoxmpc.org

Metropolitan Planning Commission and Knox County Commissioner,

I am writing to you in regards to the request to rezone property on Zion Lane to allow an Addiction Treatment Facility to be built. This topic will come up on February 9th, 2017 as Agenda Item # 40.

My family of 3 has resided in Foxfield subdivision, a subdivision located in very close proximity to this property, for almost 4 years. **I am strongly opposed to this proposal** for the following reasons.

Rezoning this property to allow an Addiction Treatment Facility is also undesirable from the standpoint of succeeding in the **mission of an Addiction Treatment Facility**.

- This proposal would locate rehabilitation patients in an area with **absolutely no public transportation**, which is typically a necessity for rehabilitation centers to allow patients to access jobs and re-assimilate into society.
- It would locate rehabilitation patients in an area with **little job opportunity**. This area in the Karns Community does not have many places of employment, and most residents either commute to other areas of Knoxville, or surrounding cities.

It is no secret that convicted criminals are typically sent to attend Addiction Treatment Facilities to avoid serving jail or prison sentences. Rezoning this property to allow an Addiction Treatment Facility is undesirable for the following **public safety reasons**:

- This would locate addicts of drug, alcohol, sex, etc. and criminals in **short proximity to the hundreds of small children** who reside in the area, three of which are my children.
- It would locate addicts of drug, alcohol, sex, etc. and criminals in short proximity to hundreds of homes and unattended vehicles which are **tempting targets for theft OR WORSE** for purposes of satisfying their addictions.

Rezoning this property to allow an Addiction Treatment Facility is undesirable for the following **community design and tax revenue reasons**:

- Over the past two decades, a half-dozen subdivisions have been built along Ball Road. These homes typically house middle-income families with small children. Allowing an Addiction Treatment Facility in the area would lower the profit potential and dissuade investments by building companies who wish to continue to build up the community like they have in the past.
- Most other properties along Ball Road are almost entirely comprised of residential homes. If zoned for this purpose, this location would be an anomaly, and would lower the property values of the hundreds of residential homes in the area.
- According to the MPC report, the three property owners reside in Portland, OR, and likely have little concern for the impacts this facility will have on our community.

In conclusion, I strongly urge you **not** to allow rezoning for the purpose of establishing an Addiction Treatment Facility in this residential part of the Karns community. If you have any doubts about the validity

of these reasons, and you haven't visited Ball Road and noticed the growing community, I urge you to do so before this item comes up for consideration. Allowing an Addiction Treatment Facility in this area would be a mistake.

Thank you,

Bevin Bates

I am **AGANIST** having an addiction treatment facility on the northeast side of Zion Lane, northwest of Ball Road. Reference File #2-A-17-SP and 2-A-17-RZ (Item 40 on the Agenda).

This is **RESIDENTIAL AREA** with five large subdivisions with **CHILDREN AND TEENS** playing outside as often as possible. I live in the Shadowbrook subdivision. There are always kids out shooting hoops in all types of weather.

Also, there are three elementary schools, one middle school, and a private christian school within 5 to 10 minutes of this location.

This is **NOT** an area for an Addiction Treatment Facility!!!

I am writing in regards to the addiction rehab center on Zion rd in Karns. My family of five lives in foxfield subdivision across the street. I strongly oppose the proposal of this facility. I have three young children, two of which ride the bus home from school, and would be affected by the added traffic on this road. I do not feel that this is a good location, in the middle of six family subdivisions, for a drug rehab center. This would bring unwanted addicts into our area, which is unsafe for children. Also this would lower our homes property value. Please do not vote for this proposal. This is not a good idea. Thank you for listening.

Good morning. My name is John Northcutt and I am a current resident of Knox County. More specifically, I am a homeowner in the Foxfield subdivision in Karns that sits across Ball Road from the proposed rezoning of Zion Lane. I am opposed to the two current proposals due to the negative impact a substance abuse facility will have on our community. This area is predominately residential and is made up of numerous families with young children. There certainly has to be a better suited location for such a facility. Additionally, this proposed facility will most certainly have a negative impact on the property values in the immediate area.

Thank you for taking the time to hear from a concerned citizen.

Regards,
John Northcutt

Re: Files numbers 2-A-17-RZ & 2-A-17-SP

Mr. Anders,

Ladies and Gentlemen of the Metropolitan Planning Commission,

I am sending this letter in **opposition** to the requested re-zoning of 3430 Zion Lane in Northwest Knox County.

I currently live in Foxfield Subdivision, which is located directly across two-lane Ball Rd from one + lane Zion Ln. We were one of the first houses Smithbilt built in here approximately nine years ago, and plan to be here for another five at least. One of the main reasons we decided to move to this area from our West Knoxville/Northshore home was the "agricultural" feel dotted with nice residential subdivisions and smaller residential properties. While we have seen home growth (and increased property values) in these last several years, the Ball Rd area remains unencumbered by businesses or high-density housing. Breaking with that community trend by re-zoning and allowing a business property, we believe, is a slippery slope precedent that could eventually lead to the decline of residential property values in this area. Add that to the fact that there are already scores of properly zoned properties available in Knox County for facilities such as these, and I guess the question is why here? Plopping a 10,000 SF building down in the middle of a neighborhood just does not fit with the layout, or to the benefit, of this area. A quick visit to the proposed site would only underscore this point. It is not a wide open four acres of lonely land, it is bordered on three sides by houses, and one side by a ridgeline, with the building plot against the road and corner property boundary.

I'd be lying if I said the clientele of the proposed facility was not a concern. I know of no one here that does not empathize with those suffering with drug or alcohol addiction. And there are no doubt individuals who voluntarily commit themselves to recovery and regaining their life. But for every one of those, how many people are force enrolled in these programs in lieu of going to jail or prison? Regardless of their intentions, facts are facts, and addicts (recovering or otherwise) can be extremely unstable and unpredictable, and have no place being in close proximity to soft targets such as children, homes, cars, etc., all of which are within literal feet of this proposed facility. Regardless of what the operators of the facility say, there is no way to protect the adjacent community from their clientele without drastically impinging on that community (large gates, alarms, cameras, armed/unarmed security personnel)...and that's only if they house residents, and has nothing to do with clients going in or out. I'm not going to continue to beat that dead horse, I'm sure you have heard it all, but I do feel it is a valid concern.

In the end, we bought a house here hoping to enjoy the community, and to make some money on our investment when we sold. I'm sure this was the reasoning behind many of the hundreds of houses that are currently down Ball Rd. I truly believe re-zoning in this area opens it up to further commercial development, which will only cause residential values to decline. Additionally, research shows that proximity to addiction centers, methadone clinics, half-way houses, recovery residences, et al, can cause a 15-20% drop in the value of your home. For me, that reason alone equates to what could be \$50,000. That's a bad deal.

Thank you for your time and review of this topic. I sincerely hope the MPC votes to deny the request for re-zoning.

Brad Baker

[MPC Comment] Plans for Addiction Center on Zion Road

1 message

Rob Noe <moe52@gmail.com>

Tue, Feb 7, 2017 at 9:15 PM

Reply-To: moe52@gmail.com

To: commission@knoxmpc.org

To whom it may concern,

This email is with reference to file #2-A-17-SP and 2-A-17-RZ, which discusses placing an addiction center in a residential-only area off of Zion Road (Northeast of Ball Road).

My young family and I (myself, wife, and 1.5 year old son) currently live in a subdivision off of Ball Road. I was surprised and dismayed when I learned of plans to place an addiction center near my subdivision as well as so many other houses. The entire area is residential, and as such, a center of this size and purpose is completely unexpected.

The reasons for my opposition to the center are as follows:

- 1). The area is highly residential, with many homes, subdivisions, and churches nearby. This setting is hardly an area for an addiction center to be placed. I believe a better location to be an area with a hospital or other businesses nearby. Due to problems that may occur at an addiction center, I would think an area with a nearby hospital would be ideal (possible violent behavior, drug overdoses, etc...).
- 2). Rezoning the area from low density residential to office would severely hamper the value of homes in the area, and simply does not make sense. The area is, a prime example of a low density residential area, and in no way should be considered suitable for offices or businesses.
- 3). There are several new subdivisions going in around the area. In my opinion if the area is having new houses constructed, it is a residential area. This should absolutely trump being able to redone an area from residential to office.
- 4). Traffic is pretty terrible as it is on Ball road. I can only imagine what it will be like with a large addiction resolution center directly off of it.
- 5). I realize that people need help with addiction, and have had several people in my life that have dealt with it. We can dance around the issue if we want to, but there are things involved with addiction and the treatment thereof that have no business in a residential area. People that are afflicted with addiction don't always have the clearest of minds, and are capable of anything. I would prefer to not have to knowingly deal with these consequences. Despite knowing that these issues exist in our world, I would prefer for them to not be in my backyard.

Please consider my and all other concerned citizen's opinions on this issue. We love our residences and would hate to see anything detrimental happen to them.

Concerned Citizen,

Rob Noe

To whom it may concern,

It will be very much appreciated if you will speak upon my behalf, my neighbors, and family to encourage MPC to deny rezoning of 3430 ZION LN (just off Ball Rd in Karns) (Parcel ID: 091 042) from low density residential to Office for a planned mental assessment and addiction treatment facility. This area is not suited or conducive to this type facility and it's participant's needs.

MPC Staff has recommended to deny. Please support this denial.

MPC's Preliminary Agenda for Thursday February 9th. Item agenda number 40, 2-A-17-SP and 2-A-17-RZ.

Please feel free to contact me at this email address or at [865-322-9283](tel:865-322-9283) if you have any questions, comments, or concerns in general regarding this matter.

Kind regards,

Mr. Chris Smith

Metropolitan Planning Commission &
Knox County Commissioner Brad Anders

It has only recently come to my attention that there is a zoning request to change the status of property at 3430 Zion Lane in Karns to allow for the development of an Addiction Treatment Center. I believe this is agenda item #40 on your agenda for your Feb. 9 meeting. I am strongly against this proposal and encourage you to make no change which would support such a development. A drug treatment facility in this area is simply a bad idea. It is not good for the patients and it is not good for the area.

As you know, the Zion Rd area of Karns is primarily residential. As such, there is little public transportation for patients to utilize and few jobs available. This is not supportive of the recovery process as it affords little opportunity for patients to re-assimilate into society, especially for any client who is also part of the criminal justice system.

There are literally hundreds of families with small children living in neighborhoods up and down Ball Rd, including my own. This type of facility in walking distance to the children in my neighborhood, Foxfield Subdivision, is of great concern. The safety of these children must always be paramount. In addition, homes, cars, and other property would be accessible, again in walking distance, to individuals fighting the challenges that come with addiction, including the likelihood of break-ins and theft to fuel the very habit they are working to get away from. While I respect that recovery is important to these individuals and to our society as a whole, I do not think it is prudent at all to locate individuals fighting such a difficult fight in such very close proximity to children and families.

Further, such a facility in a residential area would be a clear drag on property values and future development. This is bad for homeowners as well as the tax base. Currently, development of new homes is strong which is keeping our community vibrant and growing. A treatment facility such as this can put a stop to that growth very quickly. I understand that the property owners requesting the change do not live in the area, nor in Tennessee at all, and would have little appreciation for the best interests of the community as a whole.

There is too much at stake for this facility to be allowed in this area. Again, I am asking that you refuse this proposed change and that you not allow any action which would support its development. There are better locations for such a facility which do not place children and families at risk.

Thank you for your consideration,

Charles Reed II

I am emailing you and hoping and praying that you will vote no tomorrow at the meeting on a drug addiction clinic that would be directly across from our subdivision Foxfield. It would be very close to our bus stop with several younger children as well as a horrible traffic problem on Ball Road. I do not feel that this would be good for our community and our residents.

Please! please! please! vote no tomorrow in rezoning for that pain management clinic off of Ball Road. I can be reached at 690-6917, if you have any questions.

Thank you,
Angela Fritts

Reply-To: grobbs14@gmail.com

To: commission@knoxmpc.org, commission@knoxcounty.org

Dear Commissioners,

As a homeowner in the Foxfield subdivision I would like to ask that you deny the request for rezoning of the facility on Zion Ln off of Ball Rd in Karns. This is and has been an area of family rich neighborhoods that enjoy a modicum of safety due to places like this not having infiltrated our small community. Please think about our children who stand at the entrance to our subdivisions waiting on the bus in the morning and are dropped off there in the evening. Having a drug rehabilitation facility across the street would jeopardize the safety of families and create unrest in addition to lowering the value of our homes. I am a police officer for a local police department so I understand the need for drug rehabilitation more than most, I just hope you consider that Karns is first and foremost a family oriented community and one of the last areas of Knox County that truly is a great place to raise a family.

Thank you.

Garrett Robbins

To Whom It May Concern,

We live at 3426 Zion Lane. We strongly oppose the recommendations for the property 3430 Zion Lane. We think it would be a horrible decision to place the proposed facility here. We have lived here for 12 years and have seen 5 subdivisions built around us. This is a very family oriented area with lots of children. We have a day care center on the corner of Ball Road and Zion Lane. We have children getting on and off the school bus at the same location. There is also 3 schools within 5 minutes of here. This proposed facility would greatly increase traffic on a very narrow, dead end road putting our children in danger. There is no public transportation in this area which would greater add to the concern of traffic on our road. You also put us at greater risk of crime in our community! This is a very quiet and peaceful neighborhood and we would absolutely hate for this facility to be placed here! We will be attending your meeting on Thursday @ 1:30.

Sincerely,
Heath & Loretta Trillingham

This email is about Item 40.

Ref. File #2-A-17-SP & #2-A -17-RZ.

I have been a long time residents of the Karns Community. I live about 2 miles from this location. I'm very concerned about a business like this coming to a residential area. The roads that these patients would travel is already overloaded. Ball Road can not handle this traffic.

Plus we should not have to subject our children to this. Type of business in our backyards. Please do not pass this. Please don't rezone this property on 3430 Zion Lane.

Thanks

Daniel Lay

My family and I oppose a treatment facility at the northeast side of Zion Lane. That is too close to many neighborhoods that are full of children. A facility like this should not be placed so close to a residential setting. Our children ride buses and walk home from the stops and do not need the risk. I feel this type of facility is important for recovery for many, just not in this location.

Commissioners,

I strongly urge you to deny the plans for the addiction treatment facility on Zion Lane. This is a predominately residential area with a high volume of traffic as it is. The approval of this facility would result in even more traffic in such a congested area. (Zion Lane is located off Ball Road, which is home to six subdivisions.)

While I am in no way against treatment facilities, I do believe that they do not belong in residential areas. Please take into consideration the large number of children who live in this area...children who play in their neighborhoods, children who play in their front yards, children who wait at bus stops for school each morning...please consider their safety.

To: commission@knoxmpc.org, kevin.shay@cns.doe.gov

Tue, Feb 7, 2017 at 10:05 PM

February 7, 2017

Metropolitan Planning Commission and Knox County Commissioner,

I am writing to you in regards to the request to rezone property on Zion Lane to allow an Addiction Treatment Facility to be built. This topic will come up on February 9th, 2017 as Agenda Item # 40.

My family of five has resided in Foxfield subdivision, a subdivision located in very close proximity to this property, for almost 10 years. **I am strongly opposed to this proposal** for the following reasons.

Rezoning this property to allow an Addiction Treatment Facility is also undesirable from the standpoint of succeeding in the **mission of an Addiction Treatment Facility**.

- This proposal would locate rehabilitation patients in an area with **absolutely no public transportation**, which is typically a necessity for rehabilitation centers to allow patients to access jobs and re-assimilate into society.
- It would locate rehabilitation patients in an area with **little job opportunity**. This area in the Karns Community does not have many places of employment, and most residents either commute to other areas of Knoxville, or surrounding cities.

It is no secret that convicted criminals are typically sent to attend Addiction Treatment Facilities to avoid serving jail or prison sentences. Rezoning this property to allow an Addiction Treatment Facility is undesirable for the following **public safety reasons**:

- This would locate addicts of drug, alcohol, sex, etc. and criminals in **short proximity to the hundreds of small children** who reside in the area, three of which are my children.
- It would locate addicts of drug, alcohol, sex, etc. and criminals in short proximity to hundreds of homes and unattended vehicles which are **tempting targets for theft OR WORSE** for purposes of satisfying their addictions.

Rezoning this property to allow an Addiction Treatment Facility is undesirable for the following **community design and tax revenue reasons**:

- Over the past two decades, a half-dozen subdivisions have been built along Ball Road. These homes typically house middle-income families with small children. Allowing an Addiction Treatment Facility in the area would lower the profit potential and dissuade investments by building companies who wish to continue to build up the community like they have in the past.
- Most other properties along Ball Road are almost entirely comprised of residential homes. If zoned for this purpose, this location would be an anomaly, and would lower the property values of the hundreds of residential homes in the area.

- According to the MPC report, the three property owners reside in Portland, OR, and likely have little concern for the impacts this facility will have on our community.

In conclusion, I strongly urge you **not** to allow rezoning for the purpose of establishing an Addiction Treatment Facility in this residential part of the Karns community. If you have any doubts about the validity of these reasons, and you haven't visited Ball Road and noticed the growing community, I urge you to do so before this item comes up for consideration. Allowing an Addiction Treatment Facility in this area would be a mistake.

Sincerely,

Kevin Shay

Reply-To: nilgsheets@att.net

To: "commission@knoxmpc.org" <commission@knoxmpc.org>

I am a homeowner at 3257 Red Meadow Rd. Knoxville, TN 37931.

Our family was just made aware of an effort to rezone the land across from our housing development from low residential to office for the purpose of making it into a Drug Addiction Treatment Facility. Here are just a few of the reasons that I think **this is a really bad idea**:

- 1.) There are many families and families with children in our neighborhood and it will be an unsafe thing to allow such a facility in such close proximity to our children. Note: Ours is not the only housing development with children within walking distance of the proposed facility.
- 2.) It will seriously damage house prices in the vicinity, which will hurt revenue for the government.
- 3.) There is no public transportation to the facility, which will make it nearly impossible for many of the patrons of the proposed facility.
- 4.) This would be an instance of "spot zoning" (ie. zoning one piece of property something when nothing around it fits with it at all).

We certainly think this facility would be far better to be located elsewhere: near where it will:

- 1.) pose less of a threat to vulnerable (young) citizens.
- 2.) Damage the property values of the surrounding area less.
- 3.) Have a better location for transportation of the patrons.
- 4.) Fit in better with the surrounding area in general.

Please note that our household now has 3 voting members and we will be watching closely what happens with this rezoning effort and plan to respond to whatever happens with it via our votes and our ability to influence the votes of others.

Regards,
Greg Sheets and Family
3257 Red Meadow Rd.

Good evening,

My wife Kristen and myself (along with our 2 year old triplets) live in the Foxfield neighborhood which is across the street from the proposed rehabilitation center on Zion Lane.

I'm sure many of our neighbors in the area have already emailed or called to voice their concerns over this facility and I certainly want to add our names to the list. I'm encouraged that the staff is recommending to deny the zoning change and I hope they arrive at the same decision on Thursday.

I know you must receive lots of messages to this address so I'll keep my comments brief but please do not hesitate to respond to my email if I can help in any way.

Thanks,

Matt

[MPC Comment] Strongly Opposed to Addiction Treatment Facility Rezone in Karns1 message

Rose Parker <rose.parker@gmail.com>

Wed, Feb 8, 2017 at 2:11 PM

Reply-To: rose.parker@gmail.com

To: commission@knoxmpc.org, brad.anders@knoxcounty.org

I am writing to you in regards to the request to rezone property on Zion Lane to allow an Addiction Treatment Facility to be built.

This topic will come up on February 9th, 2017 as Agenda Item # 40.

My family has resided in Foxfield subdivision, a subdivision located in very close proximity to this property, for almost ten years. Rezoning this property to allow an Addiction Treatment Facility is also undesirable from the standpoint of succeeding in the **mission of an Addiction Treatment Facility and I am strongly opposed to this proposal** for the following reasons.

- This proposal would locate rehabilitation patients in an area with **absolutely no public transportation**, which is typically a necessity for rehabilitation centers to allow patients to access jobs and re-assimilate into society.
- It would locate rehabilitation patients in an area with **little job opportunity**. This area in the Karns Community does not have many places of employment, and most residents either commute to other areas of Knoxville or surrounding cities.
- It is no secret that convicted criminals are typically sent to attend Addiction Treatment Facilities to avoid serving jail or prison sentences. Rezoning this property to allow an Addiction Treatment Facility is undesirable for the following **public safety reasons**:
 - This would locate addicts of drug, alcohol, sex, etc. and criminals in **short proximity to the hundreds of small children** who reside in the area, two of which are my children.
 - It would locate addicts of drug, alcohol, sex, etc. and criminals in short proximity to hundreds of homes and unattended vehicles which are **tempting targets for theft OR WORSE** for purposes of satisfying their addictions.
- Rezoning this property to allow an Addiction Treatment Facility is undesirable for the following **community design and tax revenue reasons**:
 - Over the past two decades, a half-dozen subdivisions have been built along Ball Road. These homes typically house middle-income families with small children. Allowing an Addiction Treatment Facility in the area would lower the profit potential and dissuade investments by building companies who wish to continue to build up the community as they have in the past.
 - Most other properties along Ball Road are almost entirely comprised of residential homes. If zoned for this purpose, this location would be an anomaly and would lower the property values of the hundreds of residential homes in the area.
 - According to the MPC report, the three property owners reside in Portland, OR, and likely have little concern for the impacts this facility will have on our community.

In conclusion, I strongly urge you **not** to allow rezoning for the purpose of establishing an Addiction Treatment Facility in this residential part of the Karns community. If you have any doubts about the validity of these reasons, and you haven't visited Ball Road and noticed the growing community, I urge you to do so before this item comes up for consideration. Allowing an Addiction Treatment Facility in this area would be a mistake.

Sincerely,

Rose Parker

Absolutely vote no! There are too many young families in this area for drug addicts to be hanging around. Crime would increase due to burglary for drug money. Small children wait at the bus stop here sometimes alone. This would be detrimental to our lives.

Sincerely,
Belinda Wikel

To: commission@knoxmpc.org

Dear Knox MPC Commisioners,

I would like to let you know that I think you should vote to deny the proposed rezoning related to agenda item #40. This rezoning would place an addiction treatment facility in the middle of an area that is only residential with no nearby commercial properties. There is no shortage of vacant commercial/office zoned property in the county for this business to use, and thus no reason for this request to be approved.

Sincerely,
Steven R. Young

Reply-To: ccbbgang@yahoo.com

To: commission@knoxmpc.org

Commissioners,

In the matter regarding File #2-A-17-SP and 2-A-17-RZ (Item 40 on the Agenda), I would like the commission to deny this request for spot zoning of a treatment facility in the midst of a residential area. Surely the facility can be located in an empty space that is already located in a nearby area zoned for office or medical use! Residential crime has increased in this area in the past few years, and we do not need the additional threat of addicts seeking their next fix when our children are playing in their yards.

Thanks for your consideration,

Heidi Johnson

Regarding: Addiction Treatment Center on Zion Rd

Dear Commisioners,

I do not feel an addiction treatment center should be opened right in the middle of a residential area. This area is filled with subdivisions full of children. There is a bus stop at the end of Zion road for elementary through high school and there are also at least 3 more bus stops within a quarter mile of this road. I will not feel safe letting my children play outside or wait at the bus stop with addicts so close to home. I do not approve of this rezoning request.

Thank you for your consideration on this matter.

Thank you,
Sarah Haugstad

[MPC Comment] Zion Lane/Karns rezoning complaint

1 message

'Jennifer Bright' via Commission <commission@knoxmpc.org>

Tue, Feb 7, 2017 at 7:15 PM

Reply-To: jennrt929@aol.com

To: commission@knoxmpc.org

MPC,

I'm writing in regards to file #2-A-17-SP & #2-A-17-RZ to rezone a small area of Zion Lane off Ball Road to "office" from "residential" and as a life long resident of the Karns community, I'd like to formally request that Knox County MPC deny this rezoning request.

I understand that the purpose of this rezoning is to allow for an addiction treatment facility to operate. This is a residential area and rezoning to allow such a facility to operate in close proximity to residents could pose as a safety risk to those nearby. If the proposed clinic is a methadone or suboxone clinic then this most certainly has no benefits from being allowed in a residential area. These types of clinics are known for high patient volume and heavy traffic.

Karns is a rural community, built on rural roads and with the population increasing so rapidly due to subdivision rezoning in the community, our roads can not handle any additional traffic without major road work. From Oak Ridge Hwy to Ball Road across railroad tracks to Ball Camp Pike to Middlebrook Pike is a constant flow of traffic that typically flows well above the posted speed limits. During rush hour times the red light at Oak Ridge Hwy and Ball Road can back up for miles. The railroad crossing at Byington Solway Road, Ball Camp Pike and Andes Road is a daily hazard especially at rush hour where it's impossible to safely make a left turn from either side street. Narrow back roads Garrison Road, Grey Hendrix Road, and Beaver Ridge Road have become bypasses of Oak Ridge Hwy for parents taking children to and from schools and with multiple new subdivisions added these narrow back roads cannot accommodate the traffic and school busses safely. Please do not approve any new businesses or subdivisions on our secondary and back roads without upgrading the roads to suit the increased traffic. This includes the plans to rezone to subdivision use at the section of Andes Road near Ball Camp Pike as well.

Sincerely,

Jennifer Bright

Please consider denying the proposal to allow a drug rehabilitation facility so close to several neighborhoods off Ball Road, containing an abundance of school age children. While offering this facility has its advantages to its clients, please consider another location.

Respectfully,

Lindsay Dungan

Subject: Re meeting for drug rehabilitation center off ball rd

To: contact@knoxmpc.org

I am very concerned about the Mpc meeting Feb 9 regarding the property off ball rd that is up for being done as a drug rehabilitation center. I am a life long member of Karns community and have lived off ball rd my entire life. The property I live in has been owned in my family over 80 years. I feel like Karns is a great community to raise a child in and feel very safe letting my child play in our yard off ball rd but if the Mpc approves the rehab facility I am very concerned that a tenant of that facility could walk to my house, litter drug paraphernalia, have unstable people around the facility and many more reasons that scare me. I have always taken pride in where I live and love Karns but if that facility is approved I am afraid I will not be comfortable living where I live and may have to look into moving. My child's safety is number 1 and I will not put him in harm's way on purpose but feel like I will be doing that if it is approved and I continue to live in my neighborhood. I am praying the commissioner do the right thing and doesn't allow this facility to be built that close to a large family oriented community with a lot of young families and kids around. I feel like people on drugs or people coming off of drugs are very unstable and untrustworthy. I ask would you want these people right down from street where your child or grandchild plays? I know I don't. Please do what is right and not allow in our community. Thank you Jessica Jones

Metropolitan Planning Commission and Knox County Commissioner,

I am writing to you in regards to the request to rezone property on Zion Lane to allow an Addiction Treatment Facility to be built. This topic will come up on February 9th, 2017 as Agenda Item # 40. My family moved to Foxfield Subdivision almost 2 years ago. This was the neighborhood I always dreamed my son would grow up in. I drove down the street and literally at least every other house had kids playing outside in the front yard. I wanted my child to grow up with lots of good influences of other "good" families. We not only chose this house...but this "neighborhood" and everything that came with it. However, if I would have known that they were contemplating rezoning for a drug treatment facility I don't think I would have given it a second look.

I have been a nurse for 15 years, most of that time in the Emergency Department. I have seen firsthand what these patients are capable of. I have been trained in how to deal with them. However, I am still very cautious when dealing with them because you never know what they are capable of. Everything is fine until they decide that they don't need or want rehabilitation anymore. They become irrational and hostile without any regards to the people around them and will get what they need at whatever cost. These people have addictive personalities that are very difficult to break and have the potential to relapse at any time. A lot of these patients who have these problems also have personality disorders as well. If they are taking their medications appropriately, they can be a functioning part of society. However, because of the side effects of a lot of these medications, they stop taking them. At that time they become unpredictable and at times, unsafe. There are over 100 children that live in my neighborhood as well as the multiple neighborhoods along Ball Road. Some of these patients are being ordered to go to rehab to escape jail time. I strive very hard to protect my child from potential dangers. Please do not make my job any harder.

The whole point for a drug rehabilitation center is in fact the "rehabilitation". We are not doing them any favors by putting this facility in the middle of a subdivision where there isn't good access to public transportation. KAT buses do not come out to us. I am not sure how the patients would get there. Also, if we are trying to rehabilitate these patients and help incorporate them back into society, then I think the most appropriate thing to do is to put this facility in the middle of where they have access to the things they will need. Grocery stores, housing, jobs, etc. I think there are plenty of other appropriate places for this to be without putting it in the middle of a subdivision.

Not only do I not want this here for safety reasons, but property value is of big concern. Now I have worked very hard to build a nice life for myself and my family and make sure we ended up in a nice area. I plan to stay here for a very long time. However, if something should happen and we need to sale our house, I am quite sure that having a Drug Treatment at 0.2 miles from my house might make that very difficult and bring down the value of the entire subdivision.

As a nurse, I am immensely aware of the unending need for drug treatment facilities. I see these patients very often and have great sympathy for their needs. But I also have to protect my family and my home. At this point I am **100% against** this decision to rezone this property for the purposes intended. I am highly motivated in preventing this project to continue into our community of Karns. I am proud of where I live and hope that Karns will continue to develop and build the community to its fullest. My hope that is you will find a different location to house this project that better suits all parties involved.

Sincerely,

DaWanda S. Forester

My family and I are completely opposed to this proposal. An area full of families, children, child care and schools does NOT need an addiction treatment facility. There are many other places in the county where this could go.
