

MEMORANDUM

TO: FROM:	Knoxville-Knox County Planning Commission Michelle Portier, Planner
DATE:	March 12, 2020
SUBJECT:	3-C-20-OB : Consideration of an appeal to the Infill Housing Review Committee decision
	regarding Infill Housing case 1-A-20-IH
CC:	Gerald Green, Executive Director

STAFF RECOMMENDATION:

Deny the appeal and uphold the Infill Housing Design Review Committee decision to require access off the alley.

BACKGROUND

Staff recommends upholding the decision of the Infill Housing Design Review Committee's (IH Committee) decision to approve the applicant's request with several conditions attached to ensure it is in compliance with the **Heart of Knoxville Infill Housing Guidelines**. The applicant is appealing one of these conditions specifically, that driveway access be provided off of the alley at the rear of the property. Infill Housing Design Guidelines state that access should be from the alley in cases where there is an alley in functioning condition. The alley behind Mr. Fairchild's property is in working order and provides access to several of the residential properties that abut this alley. Of the developed residential properties on Connecticut Avenue abutting this alley, only 3 have driveway access from Connecticut Avenue. All properties with driveways on Connecticut Avenue (both sides of the street) predate the Infill Housing Design Guidelines (October, 2007) and are considered legal nonconforming.

HISTORY OF REQUEST

The applicant originally received approval to construct a new single-family house on this property in June 2008. The approved plans included driveway access off of Connecticut Avenue, which is not in compliance with IH Guidelines. The applicant came back to the Committee with the same plans in January, 2020 to revise his original request to change the window pane pattern and roofing materials. It was discovered during the course of the January meeting that the elevations were not accurate. The applicant referred to a door on the right elevation that did not exist. It was shown as a window on the plans, and another window shown on the elevation was not planned to be included on the built structure. Therefore, the previously approved building plans did not accurately depict how the applicant intended to build the structure with

regard to the right elevation. Since building inspectors would require the structure to be built as drawn and as approved, the plans would require the Committee's approval for it to be built according to the applicant's stated wishes if he wanted to include the door and delete the window.

At the January meeting, the applicant stated his wish to withdraw his application. The Committee asked if the applicant would be allowed to pull building permits with the previously approved plans and build as drawn without any changes since the vesting rights had expired. The Committee voted to postpone the decision until the City Law Department could be consulted regarding vesting rights. In accordance with Tenn. Code Ann. 13-4-310, "for approval of a preliminary development plan that does not progress in stages or phases, the initial vesting period is three years" (see Exhibit E.2).

For the February meeting, the applicant submitted a new, different set of drawings since the original plans no longer met current building codes. The new plans showed the doors and windows as described in the applicant's verbal presentation at the January 2020 meeting; the site plan remained the same as the submittal from 2008 with access off of Connecticut Avenue. The Infill Housing Design Committee voted to approve his request subject to several conditions (see Exhibits A and B).

Infill Housing Overlay Staff Comments & Recommendations

RECOMMENDATION

Staff recommends approval of the project with the following conditions:

- 1. Access shall be from the alley on streets which have alleys (p. 7).
- 2. Parking pad and driveway material shall comply with the City's Engineering Department requirements.
 - a. Parking pad shall be 18 ft x 20 ft.
 - b. If using a gravel surface, a minimum of 10-15 ft of asphalt or concrete is required to be installed from the street to keep gravel off of the alley, and landscape timbers must be installed along both sides of the driveway and around the parking pad to contain the gravel.
- 3. One native tree should be planted in the rear yard (p. 16).
- Insert 1 or 2 windows on the rear façade to meet the solid-to-void requirement of the guidelines (p. 10).
- 5. Utilize lap siding versus Dutch lap or horizontal panels to more closely resemble the exterior materials historically utilized in the neighborhood (p.13).
- 6. Utilize shake siding or horizontal lap siding beneath both front gables, since vertical siding is not allowed (p. 13).

COMMENTS

- 1. Previous approval was granted by the Infill Housing Committee for this site plan and house (with slight revisions made for this meeting) at 1201 Connecticut Avenue in 2008. However, that approval allowed some items that are not in compliance with the Infill Housing Guidelines.
- 2. While the Infill Housing Committee approvals do not have an expiration date per se, according to the City of Knoxville Zoning Ordinance, and Tennessee State Law, as referred to in the clip from the zoning ordinance below, the project's vesting rights have expired and the development must be reviewed as a new application.
- 3. The front yard and side yard setbacks are consistent with the adjacent houses and others found on this street.

- 4. Front yard planting is provided. A native tree should be planted in the rear yard, too, per the guidelines.
- 5. The driveway does not meet the infill guidelines and should be off of the alley since it is in good working condition.
 - a. Moving the driveway to the rear yard would allow the project to comply with both the Infill Design Guidelines' requirement for alley access (when available), and the City Engineering Department's requirements for a parking pad.
 - b. Driveway access off the street is somewhat consistent with the rest of the houses on the block. However, these are properties that predate the Infill Design Guidelines, and parking in front of houses is one of the conditions the guidelines attempt to mitigate over time by requiring parking and access to be off of alleys.
- 6. The front porch size and setback are in compliance with Infill Guidelines.
- 7. Scale, massing and foundation height are consistent with other houses on the block.
- 8. The other houses on the block feature a mix of window grid styles. This would be the only house with a 3-over-1 grid, but due to the mix of styles already present, and the absence of a true architectural style for the proposed house, the window style would not appear out of character.
- 9. The roof material and design are in compliance with the Committee fts Guidelines.
- 10. Vertical siding is not allowed.

REFERENCE INFORMATION: CITY OF KNOXVILLE ZONING ORDINANCE REGARDING VESTING RIGHTS

City of Knoxville Zoning Ordinance, Article 15, Section 15.3 Vesting (relevant sections only): In accordance with Tenn. Code Ann. § 13-4-310, the following provides for the vesting of developments through zoning applications.

A. Subject to item C, a vested property right must be established upon the City fts approval of a preliminary development plan, a final development plan where no preliminary development plan is required by ordinance or regulation, or a building permit allowing construction of a building where there was no need for prior approval of a preliminary development plan for the property on which that building will be constructed. During the vesting period in item C, the City fts development standards in effect on the date of said approval remain the development standards applicable to that property or building during the vesting period in item C.

B. A vested property right is established with respect to any property upon the appropriate department fts:

1. Approval of a preliminary or final development plan for any of the following Districts: RP-1, RP-2, RP-3, SC-1, SC-2, SC-3, PC-1, PC-2, BP-1, TND-1, or TC-1 Districts.

- 2. Approval regarding a project in the I-1 District.
- 3. Approval regarding a use on review.
- 4. Approval of a certificate of appropriateness, when required.
- 5. Approval of a form district project.
- 6. Issuance of a site development permit.

7. Issuance of a written finding from the Director of Plans Review and Building Inspections that allowing a property right to remain vested is in the best interests of the community.

- 8. Any other approval or issuance specified in Tenn. Code Ann. § 13-4-310.
- C. The applicable vesting periods are as follows:
 - 1. For building permits...(n/a)
 - 2. For approval of a preliminary development plan that does not progress in stages or phases, the initial vesting period is three years subject to the following:
 - a. The applicant must maintain all necessary permits during all vesting period(s) and any extension(s) in order to remain vested. During the initial vesting period, the applicant must obtain the City fts approval of the final development plan and commence site preparation. If the applicant complies, then the vesting period will be extended an additional two years.
 - b. During the two year extension, the applicant must commence construction and, if commenced, the development standards in effect during the vesting period remain in effect until the City certifies final completion of the development or project.
 - c. In no event will the total vesting period exceed ten years from the date of the approval of the preliminary development plan. (emphasis added)
- 3. For approval of a preliminary development plan that progresses in two or more stages or phases...(n/a)

CERTIFICATE OF APPROPRIATENESS FOR INFILL HOUSING

File No.: 6 - 13 - 08 - I.H

		DEVELOPMENT PLAN REVIEW MPIS
A Certificate of Appropria	iteness is hereby granted for th	e following property by the Metropolitan Planning Commission:
Address of Property:	1201 Connecticut Ave	ZONE TH-1
District:		SUBJECT TO BUILDING OFFICIAL RECEIPT OF:
Name of Owner:	Monty Fairchild	Parking, access-Circulation Plan Approved Drainage Plan
Name of Applicant:	Monty Fairchild	 Advertising Sign Detail Plan Building Design Detail Drawings
Description of Work:		Other Conditions of Approval

Architectural Building Elavations - The proposed house will have 5/12 root pitch why Feiding Area approval (see notes) See approval (see notes) See approval (see notes) See approval (as seen from Connecticut) with a minimum of 2' exposed foundation and a maximum of 4' exposed foundation. The finished floor evelvation shall be 105.6' The exposed foundation shall be treated with a sluco surface. The front porch is located to the left portion of the front façade and is 8' deep and 16' wide The roof over the porch and structure has a gable, as seen from Connecticut Avenue. The front dooor and a window measuring 36" X 48" is on the portion of the house with the porch. On the rightside of the front façade (non porch area) is a 72" X 48" widow. The windows shall have a grill pattern on the top sach and no grills on the bottom

Plot Plan - A driveway off the front shall be established and shall extend 20' behind the front habitable portion of the house. The slde yard hall be adjusted to 8' on the non driveway side and 16' on the driveway side. The front yard setback shall be 25'. The finished floor elevation shall be 105 6 feet with a maximum of 4' of exposed foundation on the front of the house, facing Connecticut Avenue. A tree shall be planted in the front yard. A private walkway will extend from the front porch steps that face the street and will run streight to the property line.

All dimensions above are from the submitted application and included as part of the Certificate of Appropriateness. The applicant is expected to build according to these approved plans.

THIS CERTIFICATE IS NOT A BUILDING PERMIT

Approved by: Jeff Archer

Date: 6/16/2008

Please note, applicant must post yellow MPC Certificate of Appropriateness for Infill Housing sign until 7/1/2008 If MPC does not receive any appeals of the decision during that time, the applicant can proceed with obtaining permits

Exhibit B. Infill Housing Meeting Minutes - see File 1-A-20-IH

INFILL HOUSING DESIGN REVIEW COMMITTEE

February MEETING MINUTES

Meeting Date/Time: Meeting Location: Committee Members Present:	February 6, 2020 at 9:00 a.m. City County Building, Small Assembly Room Michelle Portier (non-voting), Scott Elder, DeAnn Bogus, Adam
	Kohntopp, Kortni Cook, Todd Kennedy, Lindsay Crockett, Gerald Green
Committee Members Absent:	Perry Childress, Mike Reynolds
Guests:	Monty Fairchild, Daniel Orr, Kevin Mellon, Bill Terry, Steve Hall, Christina Magrans
Recorder:	Michelle Portier

Meeting was called to order at 9:05 am.

Vote to approve January 2, 2020 meeting minutes

Action: A motion was made by Deanne Bogus to approve the January 2, 2020 meeting minutes. Lindsey Crockett seconded the motion and it passed 7-0.

1-A-20-IH 1201 Connecticut Avenue – new house and driveway; Monty Fairchild, applicant

Discussion: Ms. Portier informed the Committee that, though the request was originally approved in 2008, it should be reviewed as a new application since the vesting rights had expired. She briefly summarized the new building plans submitted with the original site plan, and stated the applicant's preference to provide a driveway in the front of the house off of the street versus in the rear of the house off of the alley. She read the conditions attached to staff's recommendation for approval.

Mr. Fairchild addressed the committee and stated his arguments. He acquiesced to most of the recommendations, but held firm in that he did not want to move the access to the rear of the house. He contested staff's comments regarding vesting rights and declared his belief that the old approval should stand. He contested the requirement for Dutch lap siding as well, citing houses built within the last 2 years on Johnston Street as a basis for utilizing that material installation method. He stated his belief that he was being held to a different standard if staff's recommendations were approved.

Committee member Lindsey Crocket answered by stating that lap siding is what the guidelines call for and is consistent with original housing built in that area. Gerald Green, Director of Knoxville-Knox County Planning stated that the current body is not responsible for the

enforcement of its decisions, nor is it responsible for past Committee decisions. He stated that inconsistent enforcement of the Infill Zone's guidelines is not justification to render a decision contrary to those guidelines.

Christina Magrans, attorney for the City of Knoxville, discussed the difference between the Infill Housing Committee application expiration and that of state law and reiterated that the vesting rights had expired. She explained vesting rights' expiration dates and agreed that the applicant's request should be reviewed as a new application. Director Green also agreed, and specified that the guidelines were very clear in stating that access should be off alleys when alleys are functional – that this was one of the issues the guidelines sought to redirect when they were first rewritten. He stated that the intent is to decrease the number of cars parked in the front yard, which is unsightly, and encouraged the Committee to hold to that requirement.

Committee Member Scott Elder noted the difference in porch depth from the original plans reviewed in January to the revised plans the Committee was reviewing this month and stated that the increased porch depth encroached further into the setback requirement of the underlying zone. He stated that the Committee could approve it to maintain consistency with other houses on the block, but the decreased setback should be part of the record.

Action: A motion was made by Gerald Green and seconded by Lindsey Crockett to approve the project in accordance with staff recommendations and noting the 8-foot porch depth encroachment into the setback area. The motion passed 7-0.

2-A-20-IH 1731 Nickerson Avenue – partial front porch enclosure; Daniel Orr, applicant

Discussion: Ms. Portier introduced the item, stating that the applicant had been unaware he needed a building permit and had begun work on the project before being issued a stop work order. She showed pictures of construction work in progress and of damage sustained to the ceiling inside the structure due to roof leaks.

Mr. Orr addressed the committee and stated his arguments. He briefly described the damage sustained to the structure, which had begun before he owned the house. He reported that much of the damage is structural and would require extensive work to fix. Orr further stated his intent to incorporate original design elements in his proposal and his belief that his remodel aligns with architectural character of the neighborhood. He noted other houses in the Folk Victorian style in the near vicinity.

Director Green thanked the applicant for trying to save the house and asked if he could have repaired it without changing the design. The applicant answered that none of the elements could be saved but needed replacement. He further detailed the damage to the porch, columns, roof, gutters, and other structural elements and reiterated that the front of the house needed an extensive remodel with some demolition of front façade and porch elements required.

Committee Member Elder noted the difference in setbacks with the addition of the front porch changing the beginning of the primary structure. He noted the Committee could approve that but should be aware that if approved, the structure could have a front porch addition in the future.

Exhibit C. Infill Housing Design Guidelines pertaining to driveway access

Design Guidelines

3 Alleys, parking, and services

Alleys should serve two significant purposes: (1) accommodation of such services as utilities and garbage collection, and (2) access to off-street parking including garages and parking pads. A large proportion of the "Heart of Knoxville" neighborhoods have alleys. Unfortunately, such standards as setbacks for garages, types of materials for parking pads and encouragement of alleys for offstreet parking are lacking. With infill development, the use of alleys for parking is necessary.

Infill guidelines

- Parking should not be in front yards.
- Alley access should be used for garage or parking pad locations. On level ground, pea gravel or similar material may be used as a parking pad off alleys.
- On streets without alleys, garages, or parking pads should be at least 20 feet behind the front façade of the infill house.
- Garages which are perpendicular to the alley should be about 15 feet from the center line of the alley pavement, allowing a comfortable a turning radius for a driver to enter a garage.
- Alley-oriented parking pads, garbage collection points, and utility boxes should be screened with a combination of landscaping and fencing.
- On those streets which have alleys, driveways should not be permitted from the front of the house.

Michelle Portier <michelle.portier@knoxplanning.org>

Letter from Engineering re: condition of alley to the north of Connecticut Avenue

Curtis Williams <cmwilliams@knoxvilletn.gov> To: Michelle Portier <michelle.portier@knoxplanning.org> Thu, Feb 27, 2020 at 4:07 PM

Knoxville Knox County Planning Staff,

The City of Knoxville Department of Engineering has evaluated the sec on of alley that is bound by Johnston Street to the east, Connecticut Avenue to the south, Burnside Street to the west, and Delaware Avenue to the north. The alley is paved and appears to be used by several of the adjacent proper es as either primary or secondary access. Additionally, the alley is used for garbage collection. In general, the alley is in good condition. Please let me know if we can be of further assistance.

Subject: Letter from Engineering re: condition of alley to the north of Connecticut Avenue

Curtis,

Can I get a letter from the Engineering Department relating to the condition of the alley behind 1201 Connecticut Avenue? We have an applicant for the Infill Housing Design Committee who is appealing the Committee's decision to require driveway access to be off of the alley. They approved his application, but that was one of the conditions.

I've attached the package from the meeting in case you need to review the proposal and decision. Let me know if you have any questions.

Thank you!

Michelle

Exhibit E.1. City of Knoxville Zoning Ordinance, Infill Housing Review

16.6 INFILL HOUSING OVERLAY DISTRICT REVIEW

A. Purpose

Design review within the IH Overlay District. Review is intended to ensure conformity with the standards of the applicable design guidelines.

B. Initiation

No building permit will be issued for the following activities within an IH Overlay District without issuance of a certificate of appropriateness by the Infill Housing Review Committee:

- **1.** New primary structure.
- **2.** Additions visible from the primary street.
- 3. Changes to porches visible from the primary street.
- 4. Driveways, parking pads, access points, garages or similar facilities.

C. Authorization

All applications for certificates of appropriateness within an IH Overlay District will be reviewed by the Infill Housing Review Committee within 30 days. The Infill Housing Review Committee has the power to approve, approve with conditions, or deny a certificate of appropriateness.

D. Design Review Standards

Design review and approval of a certificate of appropriateness is required for any building permit or request for subdivision approval within the IH Overlay District. Review must be based on conformity with the standards of the applicable design guidelines, which are made a part of this Code amendment by reference.

1. The district is intended to foster compatible infill housing, which may have different open space, height, and off-street parking regulations than those found in the base district. Minimum lot sizes and setbacks may differ from those required by the base district in order to realize the principles associated with the guidelines. The Infill Housing Review Committee may vary the base district regulations by issuance of a certificate of appropriateness. The issuance of a certificate of appropriateness will relinquish any need for variances within the overlay district.

2. Lot sizes, front, side and rear setbacks, and off-street parking are to be in accordance with the principles of the applicable design guidelines.

3. An alley must serve as the primary means of ingress and egress for all dwelling units unless special site circumstances or conditions prohibit alley access, such as exceptional narrowness or topography.

E. Applications

An application for a certificate of appropriateness must include:

- 1. Front and side elevation drawings
- **2.** Plot plan with address and CLT#
- 3. Elevation of corners
- 4. Finished floor elevation (approximate)
- 5. Setbacks
- 6. Driveway and sidewalks locations (proposed and existing)
- 7. Alley location if lot is adjacent to an alley
- **8.** Applicable design guidelines checklist

F. Issuance of Building Permits

No building permit will be issued until after the appeal period expires. If an appeal is filed, no building permit will issue until the appeal is resolved.

G. Appeals

Anyone aggrieved by a final determination of the Infill Housing Review Committee may file an appeal in accordance with Section 16.12.

Exhibit E.2. City of Knoxville Zoning Ordinance, Vesting

15.3 VESTING

In accordance with Tenn. Code Ann. § 13-4-310, the following provides for the vesting of developments through zoning applications.

A. Subject to item C, a vested property right must be established upon the City's approval of a preliminary development plan, a final development plan where no preliminary development plan is required by ordinance or regulation, or a building permit allowing construction of a building where there was no need for prior approval of a preliminary development plan for the property on which that building will be constructed. During the vesting period in item C, the City's development standards in effect on the date of said approval remain the development standards applicable to that property or building during the vesting period in item C.

B. A vested property right is established with respect to any property upon the appropriate department's:

1. Approval of a preliminary or final development plan for any of the following Districts: RP-1, RP-2, RP-3, SC-1, SC-2, SC-3, PC-1, PC-2, BP-1, TND-1, or TC-1 Districts.

- 2. Approval regarding a project in the I-1 District.
- 3. Approval regarding a use on review.
- 4. Approval of a certificate of appropriateness, when required.
- 5. Approval of a form district project.
- 6. Issuance of a site development permit.

7. Issuance of a written finding from the Director of Plans Review and Building Inspections that allowing a property right to remain vested is in the best interests of the community.

- 8. Any other approval or issuance specified in Tenn. Code Ann. § 13-4-310.
- **C.** The applicable vesting periods are as follows:

1. For building permits allowing construction of a building where there was no need for prior approval of a preliminary development plan for the property on which that building will be constructed, the vesting period begins on the day the building permit is issued. The vesting period lasts through the expiration of the building permit and any renewals, unless the applicant has not pursued with reasonable diligence site development or construction.

2. For approval of a preliminary development plan that does not progress in stages or phases, the initial vesting period is three years subject to the following:

a. The applicant must maintain all necessary permits during all vesting period(s) and any extension(s) in order to remain vested. During the initial vesting period, the applicant must obtain the City's approval of the final development plan and commence site preparation. If the applicant complies, then the vesting period will be extended an additional two years.

b. During the two year extension, the applicant must commence construction and, if commenced, the development standards in effect during the vesting period remain in effect until the City certifies final completion of the development or project.

c. In no event will the total vesting period exceed ten years from the date of the approval of the preliminary development plan.

3. For approval of a preliminary development plan that progresses in two or more stages or phases, a separate vesting period as described in item C.2 applies to each section or phase subject to the following:

a. The applicant must maintain all necessary permits during all vesting period(s) and any extension(s) in order to remain vested. The development standards in effect on the date of the approval of the preliminary development plan describing the first stage or phase apply to all subsequent stages or phases.

b. If the applicant begins construction, the development standards in effect during the vesting period remain in effect until the City certifies final completion of the development or project.

c. In no event will the total vesting period for all stages or phases exceed 15 years.

D. In accordance with Tenn. Code Ann. § 13-4-310(f), the City may terminate the applicant's vested rights under the following circumstances.

1. If the City finds in writing that the applicant violated terms and conditions specified in the approved development plan or building permit, the applicant will receive notice and has 90 days from the date of notification to cure all violations.

2. If the City finds in writing that the applicant violated terms and conditions specified in a City ordinance or resolution, the applicant will receive notice and has 90 days from the date of notification to cure all violations.

3. If the City finds in writing that the applicant: 1) intentionally supplied inaccurate information or knowingly made misrepresentations material to the issuance of a building permit or the approval of a development plan; or 2) knowingly did not construct the development in accordance with the issued building permit, approved development plan, or approved amendment for the building permit or development plan. In such case, the applicant has no right to cure the violations.

4. If the City is required to enforce a state or federal law, regulation, rule, policy, corrective action, or other governance that precludes the development as contemplated in the approved development plan or building permit, the vested rights terminate unless within 90 days the applicant modifies the development plan or building permit in a way that brings the applicant into compliance with the new governance.

E. A vested right does not preclude the City's enforcement of any development standard in accordance with any circumstances described in Tenn. Code Ann. § 13-4-310(g).

F. In accordance with Tenn. Code Ann. § 13-4-310(h), any amendment to an approved development plan must first be approved by the City in order for the property rights to remain vested. The City may deny an amendment in accordance with Tenn. Code Ann. § 13-4-310(h) and, if such amendment is denied, the applicant may either proceed with no changes to the prior approved plan with the associated vested property right or, alternatively, may allow the vested property right to terminate and submit a new application in compliance with the development standards in effect at that time.

G. Unless specifically addressed herein, all other provisions of Tenn. Code Ann. § 13-4-310 are adopted and incorporated by reference.

H. Article 15.3 is controlling notwithstanding any other section of this Zoning Code.

*Note: all properties with driveway access off of Connecticut Avenue predate the Infill Housing Guidelines
