STAFF RECOMMENDATION:

- ▶ **Postpone the concept plan application until the February 8, 2024 Planning Commission meeting as requested by the applicant.**

- ▶ **Postpone the development plan application until the February 8, 2024 Planning Commission meeting as requested by the applicant.**

COMMENTS:

This subdivision is for 89 detached residential house lots on 44.87 acres. The TIS recommends construction of a separate left-turn lane on Millertown Pike for entering vehicles at the proposed entrance.

ESTIMATED TRAFFIC IMPACT: A traffic impact study was prepared by the applicant. The findings of that study were used in formulating the recommendations of this staff report.

ESTIMATED STUDENT YIELD: 38 (public school children, grades K-12)

Schools affected by this proposal: Ritta Elementary, Holston Middle, and Gibbs High.

- Potential new school population is estimated using locally-derived data on public school student yield generated by new housing.
- Students are assigned to schools based on current attendance zones as determined by Knox County Schools. Students may request transfers to different zones, and zone boundaries are subject to change.
- Estimates presume full build-out of the proposed development. Build-out is subject to market forces, and timing varies widely from proposal to proposal.
- Student yields from new development do not reflect a net addition of children in schools. Additions occur incrementally over the build-out period. New students may replace current population that ages through the system or moves from the attendance zone.

Knoxville-Knox County Planning Commission's approval or denial of this concept plan request is final, unless the action is appealed to Knox County Chancery Court. The date of the Knox County Chancery Court hearing will depend on when the appeal application is filed.

The Planning Commission's approval or denial of this development plan request is final, unless the action is appealed either to the Board of Zoning Appeals or to a court of competent jurisdiction within thirty (30) days of the decision being appealed (Knox County, Tennessee Code of Ordinances, Appendix A, Zoning, 6.50.08).

VARIANCES

The Planning Commission may reduce or otherwise vary the requirements of the Subdivision Regulations when it finds the hardship criteria are met. In granting such variances, the Planning Commission may attach and require whatever conditions it feels are necessary to secure the basic objectives of the varied regulations. Any variance granted by the Planning Commission shall be noted in its official minutes along with the justification for granting the variance (Subdivision Regulations, Section 1.05).

Hardship conditions to be met:

1. **Conditions Required.** Where the Planning Commission finds that extraordinary hardships or particular difficulties may result from the strict compliance with these regulations, they may grant, by way of application, variations to the Subdivision Regulations, subject to specified conditions, so that substantial justice may be done and the public interest secured, provided that such variations shall not have the effect of nullifying the intent and purpose of these regulations or the comprehensive plan.
2. **Evidence of Hardship Required.** The Planning Commission shall not grant variations to the Subdivision Regulations unless they make findings based upon the evidence presented to them in each specific case that:
 - a. Because of the particular surroundings, shape, or topographical conditions of the specific property involved, a particular hardship to the owner would result, as distinguished from a mere inconvenience, if the strict letter of the regulations were adhered to.
 - b. The conditions upon which the request for a variation is based is unique to the property for which the variation is sought and is not applicable, generally, to other property, and has not been created by any person having an interest in the property.
 - c. The purpose of the variation is not based exclusively upon a desire for financial gain.
 - d. The granting of the variation will not be detrimental to the public safety, health, or welfare, or injurious to other property or improvements in the neighborhood in which the property is located.

Variances Requested:

For each variance requested, identify the hardship that would result, as distinguished from a mere inconvenience, if the strict letter of the regulations was adhered to.

1. Variance requested:

Horizontal curve radius on Rd "B" at sta 17+00 from 250' to 150'

Identify the hardship that would result for each of the above criteria as noted in item 2 above:

- a. Shape of property lends itself to the smaller radius
- b. Request was not created by the owner.
- c. Request is not for a financial reason
- d. DOT design allows a 100'R for low volume residential roads

Engineering supports the variance requested (to be completed during review process): YES NO
