

For 27 years I have lived near the planned 3-SB-21-C subdivision. Area has consistently gone downhill so I oppose another subdivision. Below is why.

WATER - Not enough water for the area. I lose water pressure all the time.

DUMP/GARBAGE - Carter dump wasn't built big enough for the current population. We always have to constantly wait in line. Because of that people are throwing out litter and full trash bags, tires and furniture along our roads. People are starting to pile up trash and mattresses in their backyards contaminating runoff to rivers.

NOISE - More dogs everyday barking ALL DAY and running loose. Constant shooting and explosions.

TRAFFIC - Area is too busy. Can't go to the mailbox without getting run over. Cars racing down roads with 25 mph speed limit. People park at the edge of roads. Mail boxes encroach on roads. Vehicles can't pass. Roads not big enough to pass with current traffic.

CODE ENFORCEMENT - can take care of the current area. Abandoned empty houses around for years, white cars sitting so long they are green, abandoned RV's, undriven cars and trucks everywhere. Business being run out of their homes. Area is running down with no code enforcement.

POLICE - are already too busy to patrol the area. I never see one.

You've already added the golf course giving us plenty of pesticides to breath.

We are already dreading the Midway Industrial park and all the additional traffic.

This packed subdivision will just end up like public housing with more to deal with.

Please, please reconsider.
