

On-Site Devastation

Trees and Garbage

30 foot trees toppled with a bull dozer

Looks like a drainpipe???

Drainpipe???

Huge Tree Piles every where

Filled in Creeks/Water Ways

Graded, Changed major creek/water ways

Creeks filled in with Trees and debris

Water way filled in

Grading in a very steep road

Hill sides stripped of 90% of the trees creek at base of hill is filled in.....Zero erosion control....danger!

Cleared trees right up to neighbor's property lines

Lose soil on hillsides will lead to erosion problems

The water ways have been moved and drastically changed in order I suppose to be more conducive to more houses
