

I would like to voice my concerns with the infrastructure of S Northshore. We currently have no sidewalks, which is extremely dangerous. We are giving roads down S Northshore with barely a proper shoulder so can you imagine when families want to walk to Weigles or concord park. It's a death sentence.

Even for drivers if you move too far to the right you fall off the road. You have no way to swerve, without a doubt you choose the worst of the two evils hit a car head on or fall off the side of a road without proper shoulders.

I am happy to see we are growing and expanding but what needs to be taken in consideration is infrastructure. Roads with proper shoulders and left turn lanes and sidewalks all the way to concord park would be ideal.

This is not even all the issues, what about the bus issues for the schools and what about the schools.

What about a grocery store in the area, I mean why don't we have a dollar general yet.

I ask that you please consider the current issues before you start building more homes. If this area is going to get built up, maybe a plan for commercial properties needs to be formed. (I know neighbors don't want to hear that, but at this point we are sitting in an area of a gold mine of land so we must think of what is best for living here, driving 40 min for groceries or 15 min.

I appreciate your time and I hope if this is approved the builder/ owner will think less of the mighty dollar and more of building a community that has great infrastructure and put a hold until Knox county can see we need some major improvements with roads and sidewalks
