

As a 31 year Knox County resident and new property owner off Harvey road, I am very concerned for the safety of my family and neighbors. THANKYOU for recommending less density at 3/ AC. However, the elected and appointees should consider the vote as you continue to add housing in the deep west Knoxville quadrant. Most concerning is the power, water and safe roads to support this rapid and dense growth around formerly dense agriculture areas.

- There were brown-outs in 2023. Have you studied the power needs already in the LCUB area?
- The 1st Utility Water pressure is not keeping up with current demand. Have you done a study of their infrastructure to see if they are ready for the added water use?
- The roads are not designed for more cars. Particularly the Northshore to Harvey Rd area. You would be adding to an already dangerous roadway. Please!
- 

At a minimum widen Northshore in this area, straighten this road out at the round-about! Send Knox county sheriff over to watch how people take wide turns and drive over the line to make a turn. Notice the swerve-driving as people are distracted on Northshore drive with no shoulder!

Come check this area out for yourself! It is dangerous! Please! Fix these infrastructure concerns BEFORE you build another neighborhood!
