

dangerous intersection entering Merchant Dr from Wilkerson Rd or from Melstone Rd, due to the lack of hillside structure at this busy area.

2. Back road neighborhood streets cannot handle the additional cut through traffic to avoid Merchant Rd, especially from the Wilkerson Rd. & Melstone area to McClain at Clinton Highway. McClain currently backs up at that light and too narrow to handle additional traffic. Again, there is a lack of infrastructure to allow for safety.
3. Destroying the trees to build this development will leave a large carbon footprint. Take away the trees and adding additional vehicles to pollute the same area. This area has flooding issues and has for years. The additional runoff with less Hillside Protection will create additional flooding that affects homes along Monterey.
4. Norwood Elementary School is one mile from this proposed development. Northwest Middle School is approximately the same distance. With 10 additional three-bedroom dwellings, the true impact will be greater than the Estimated Student Yield of one (1) student. Safety for our children is a big concern as these neighborhood streets do not have sidewalks.
